

Release 1 - Burndown chart

As can be seen in the release 1 Burndown chart this displays the productivity throughout Release 1, as you can see in the first sprint we were able to meet the ideal productivity of our product. Then we started to fall behind a little in sprint plan 2, the main cause of this is due to testing functionality wise we are on time. Release 1 ended up being finished at the beginning of release 2 putting us a little behind schedule for the first release.
